CIAM INDUSTRIE strengthens its international presence with the addition of Oscartek

After completing in 2025 the acquisitions of Criocabin and CierreEsse - alongside CIAM S.p.A., the founding company and industrial core of the Group - and following the entry of Caméléon Concept, a commercial entity active in the French market, CIAM INDUSTRIE continues its international development path by **announcing, through CIAM USA, the entry of Oscartek into the Group.**

The transaction aims to strengthen the Group's presence in the North American market by enhancing service capabilities, spare parts availability and local support of the historic Oscartek brand, with coverage on both coasts. The integration will also improve commercial and operational responsiveness, thanks to a stronger local presence.

Federico Malizia, President of CIAM INDUSTRIE, stated:

“The entry of Oscartek represents a natural evolution of the path we have undertaken. We are building a solid industrial group, capable of integrating different competencies and structurally strengthening our international presence—particularly in the American market—while keeping reliability, quality and innovation at the core.”

Rabih Ballout, founder of Oscartek, added:

“After years of collaboration, Oscartek's entry into CIAM INDUSTRIE represents an important and natural step. Becoming part of an industrial group of this scale will provide new momentum and greater solidity to the company's development, while preserving its identity. I will continue to be involved in the project by retaining a 10% equity stake, with the aim of actively contributing to this new phase of growth.”

Through this development path, CIAM INDUSTRIE consolidates its industrial and commercial structure, strengthens its position in international markets and creates the conditions for new synergies, confirming a long-term growth-oriented vision.
